

Come Back from Being Dead

We asked children to tell us a story about a magical power they wish they could have. Our challenge to you is to design and build a networked physical device inspired by these stories.

The Story

My power will let me reanimate myself. When I die I will be able to come back to life a few seconds later and also be young again! This lets me live forever.

Sample Idea

You could use a pulse oximeter to monitor your pulse and alert you to dangerous situations.

Or you could construct something enchanted which communicates with the dead!

Components you might like:

Optical switch reflector, piezo transducer, proximity sensor, speaker, microphone.
