

If your ball is burst then my power would be able to fix it.

Fix Everything

We asked children to tell us a story about a magical power they wish they could have. Our challenge to you is to design and build a networked physical device inspired by these stories.

The Story

My power fixes broken things. If a toy is broken it can make them work like new again. All you have to do is say a wish and burst footballs are fixed again.

Sample Idea

You could use a canister of gas to re-inflate things when they detect a drop in pressure. Or an elaborate puncture repair kit dispensing machine.

Components you might like:

Beach ball, lifejacket & compressed gas canister, glue & tape.
