

Magic Eyes

We asked children to tell us a story about a magical power they wish they could have. Our challenge to you is to design and build a networked physical device inspired by these stories.

The Story

My power means that staring at someone or something makes it fall over, grow a tail, or turn a human into an animal.
It can turn annoying or horrible teachers into animals!

Sample Idea

You might want to build a Bluetooth voice modulator which makes anything you say sound like an animal.
Or a 2D drawing machine which can draw animal features on your skin, like fur, scales or whiskers!

Components you might like:

Piezo transducer, stepper motors, rotary potentiometer.
