# Learn History by Time Travel

We asked children to tell us a story about a magical power they wish they could have. Our challenge to you is to design and build a networked physical device inspired by these stories.

## The Story

My power would let me travel to the past to learn about the Victorians, and to the future to meet new kings.

It can also take me to when you are old or when you are little. It is to learn and discover old times and new times.

## Sample Idea

You could augment a modern device by transforming the technology or the interface into an old fashioned one (like a steampunk phone), or imagine new physical functionality.

Or perhaps you could design a pair of binoculars which can change the view through them and simulate time travel.

## Components you might like:

Meccano, stepper motors & pulleys, binoculars, glasses.
